

Pandas Task

<https://drive.google.com/drive/folders/120Fqc23WBwMkWpWZlrhZ72np8EJ3Y08W?usp=sharing>

This task focuses on practicing **data manipulation in Python using Pandas**. You will work with a weather dataset to:

- Load and explore data.
- Select rows/columns with indexing.
- Filter data using conditions.
- Transform and create new columns.
- Aggregate and group data.
- Sort and rank values.
