

**Q1:** Create a database named **SchoolDB**.

**Q2:** Switch to use the newly created **SchoolDB** database.

**Q3:** Create a table named **Students** with the following columns:

- StudentID (int, Primary Key)
- FirstName (varchar(50))
- LastName (varchar(50))
- Age (int)
- Email (varchar(100))

**Q4:** Create a table named **Courses** with the following columns:

- CourseID (int, Primary Key)
- CourseName (varchar(100))
- Credits (int)

**Q5:** Create a table named **Enrollments** to connect **Students** and **Courses** with the following columns:

- EnrollmentID (int, Primary Key)
- StudentID (Foreign Key referencing Students)
- CourseID (Foreign Key referencing Courses)
- EnrollmentDate (date)

**Q6:** Alter the **Students** table to add a new column named **Address** (varchar(255)).

**Insert exactly the following data into each table:**

**Q7:** Insert the following records into the **Students** table:

- (1, 'John', 'Doe', 20, '[john.doe@example.com](mailto:john.doe@example.com)', '123 Main St')
- (2, 'Jane', 'Smith', 22, '[jane.smith@example.com](mailto:jane.smith@example.com)', '456 Maple Ave')
- (3, 'Ahmed', 'Ali', 19, '[ahmed.ali@example.com](mailto:ahmed.ali@example.com)', '789 Elm St')
- (4, 'Sara', 'Connor', 21, '[sara.connor@example.com](mailto:sara.connor@example.com)', '321 Oak St')

**Q8:** Insert the following records into the **Courses** table:

- (101, 'Mathematics', 3)
- (102, 'Physics', 4)
- (103, 'Chemistry', 3)
- (104, 'Biology', 4)

**Q9:** Insert the following records into the **Enrollments** table:

- (1, 1, 101, '2024-01-15')
- (2, 2, 102, '2024-01-16')
- (3, 3, 103, '2024-01-17')
- (4, 4, 104, '2024-01-18')

**Q10:** Update the **Credits** of the course with CourseID = 102 to **5**.

**Q11:** Delete the student record from **Students** table whose StudentID = 1.

**Q12:** Retrieve all students whose age is greater than **20**.

**Q13:** Retrieve all courses ordered by course name in ascending order.

**Q14:** Retrieve all enrollments that occurred after '**2024-01-16**'.

**Q15:** Retrieve details of students whose first name is '**Sara**'.

**Q16:** Retrieve courses that have exactly **3 credits**.

**Q17:** Retrieve students whose age is between **20 and 22** inclusive.

**Q18:** Retrieve students whose first name is either '**Jane**' or '**Ahmed**'.

**Q19:** Retrieve enrollments between the dates '**2024-01-15**' and '**2024-01-17**' inclusive.

**Q20:** Alter the **Courses** table by dropping the column **Credits**.
