

Task: Power BI

Using the *Data Science Survey* dataset, complete the following task:

1. Load the dataset into **Power BI Desktop**.
2. Open the **Power Query Editor**.
3. Apply all necessary data transformations and cleaning steps (such as handling null values, renaming columns, changing data types, removing duplicates, splitting/merging columns if needed, etc.).
4. After completing all transformations, click **Close & Apply** to load the cleaned data into the data model.
