

Your task is to **replicate the Sales Performance Dashboard** we built during the session using the provided Excel sales dataset.

You are expected to apply the same steps we covered, which include:

1. Using **PivotTables** and **Charts** to calculate and visualize:

- Total number of orders
- Total sales
- Total production cost
- Total discounts
- Total profit
- Profit and discount trends by **month** and **year**
- Production cost by **year**
- Profit per **category**
- Production cost per **category**

2. Creating **interactive slicers** for:

- Category
- Year
- Month

3. Designing the dashboard layout clearly and professionally, similar to the sample provided.

✚ Make sure your dashboard includes all the charts and KPIs in a well-structured format.
